Broadwell uses Colonial Zapotec texts to provide evidence that the innovative progressive aspect prefix, characteristic of the Central Zapotec branch, must date to before 1300.

George Aaron Broadwell, "The Historical Development of the Progressive Aspect in Central Zapotec," *International Journal of American Linguistics* 81, no. 2 (April 2015): 151-185. DOI: 10.1086/680236.

About the Project

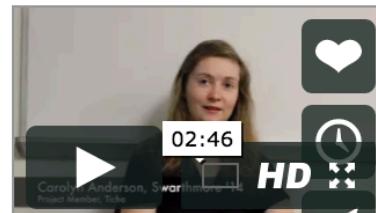

Ticha is an online, digital explorer for a corpus of Colonial Zapotec texts. (The name *ticha* comes from the Colonial Valley Zapotec word for ‘word’, which also means ‘language’.) Zapotec is an indigenous language family of Mexico, has a long record of alphabetic texts, the earliest dated 1565 (Oudijk 2008:230). Reading and interpreting these colonial documents can be extremely difficult because of the challenges of early Zapotec orthography, vocabulary, grammar, and printing conventions, yet the documents contain rich linguistic, historical, and anthropological information.

While currently in a mock-up stage, Ticha will eventually allow a user to access and explore many interlinked layers of these texts, including images of the original documents, transcriptions, translations into English and modern Spanish, linguistic analysis (including morphological interlinearization), and commentary. Ticha is innovative in bringing together data analyzed in FLEX (Fieldworks Language Explorer, fieldworks.sil.org) a system for lexical and grammatical analysis, with current TEI standards (Text Encoding Initiative, tei-c.org) for paleographic and translational representations of texts. This tool will make Colonial Zapotec texts accessible to scholars in diverse fields (including linguistics, anthropology, and history), Zapotec community members, and the general public.

The Team

An interdisciplinary team brings their diverse skill set to an archival corpus.

Brook Danielle Lillehaugen [webpage](#) Linguist– Assistant Professor, Haverford College

Brook Danielle Lillehaugen is Assistant Professor of linguistics at Haverford College, with joint appointments at Bryn Mawr and Swarthmore Colleges. She received her Ph.D. in linguistics from the University of California, Los Angeles in 2006 and has been working on colonial and modern Valley Zapotec since 1999. She is co-author of Cali Chiu? A Course on Tlacolula Valley Zapotec (Munro, Lillehaugen, and Lopez 2007) and publishes on the grammar of Zapotec in both its modern and colonial forms. In collaboration with other linguists, the Living Tongues Institute, and native Zapotec speakers, she is developing online Talking Dictionaries for Valley Zapotec language varieties. She received a NEH Summer Stipend in 2014 to translate the Zapotec language portions of Cordova's Arte and in August 2015 will begin a project translating a corpus of Colonial Valley Zapotec last wills and testaments supported by fellowships from the ACLS and the NEH.

George Aaron Broadwell [webpage](#) Linguist– Professor, University at Albany, SUNY

George Aaron Broadwell is Professor in the Department of Anthropology and the Program in Linguistics and Cognitive Science at the University at Albany, State University of New York. His research focuses on the documentation of Native American languages, particularly in the southeastern United States and Oaxaca, Mexico. He has worked with Zapotec languages since 1989, with research on three modern varieties (Santa Ana del Valle, San Dionisio Ocotepec, and Macuiltianguis) as well as Colonial Valley Zapotec materials. He is the author of numerous publications on Zapotec and also author/editor of A Choctaw Reference Grammar; The origin of the sun and moon: A Copala Triqui legend; and Nana naguan' rihaan nij sii chihaan': Words of counsel for the Triqui people.

Michel R. Oudijk [webpage](#) Ethnohistorian, Universidad Nacional Autónoma de México

Michel R. Oudijk is an historian/philologist whose main interest is Zapotec historiography and its relationship to present day communities. Since 1992 he has worked in three of the four main Zapotec regions and is renowned for his analysis of pictographic and alphabetic documents alike, relating historical information to present day landscapes and oral tradition. His work on the indigenous participation in the "Spanish" conquest of Mexico has opened up a whole new field of study called the New Conquest History. In 2000 he received his Ph.D. at Leiden University, after which he worked for a year in the National Archives of the Indies in Seville, Spain. From there he became full professor at the University of Copenhagen, Denmark, and since 2004 he is a researcher at the Institute of Philological Studies at the Universidad Nacional Autónoma de México (the National Autonomous University of Mexico). He has published seven books and over 40 articles and chapters in journals and volumes all over the world, and is a well-known speaker at international academic meetings and in local indigenous communities events.

Laurie Allen Coordinator for Digital Scholarship and Services at Magill Library, Haverford College

Laurie Allen is Coordinator for Digital Scholarship & Services at Haverford College. She earned a Bachelor's Degree from Bard College and an MS in Library and Information Science from Simmons College. She worked for 6 years at the Social Science Data and Research & Instructional Services Department at the University of Pennsylvania before joining the Haverford College Libraries in 2008. Since 2011, Allen has led a team of students and staff within the Haverford Library as Coordinator for Digital Scholarship & Research Services. The [Digital Scholarship Group](#) supports faculty and student research projects with technical and infrastructural support. Allen and her team support several Drupal sites, databases, and mapping projects including The Global Terrorism Research Project and others. Allen has experience developing and training in Drupal, XML and TEI, and XSLT.

Linguistic background

Zapotec is an extensive language family indigenous to southern Mexico, which belongs to the larger **Otomanguean family**. Today, there are over 50 different Zapotec languages (iso code **zap**), most of which are endangered. They are spoken primarily in the state of Oaxaca, Mexico, by a total of approximately 425,000 people (**INEGI 2010**) within a much larger Zapotec ethnic community. Due to immigration, there are now Zapotec speakers in many other parts of Mexico and the United States. Dialectal divergence between Zapotec-speaking communities is extensive and complicated. Many varieties of Zapotec are **mutually unintelligible** with one another. The **Zapotec language family** is on par with the **Romance language family** in terms of time depth and diversity of member languages.

The variety of Zapotec presented in Ticha represents the Zapotec of the colonial period of Mexico (1521-1821). During this period, hundreds of documents were written in Zapotec, including religious materials, last wills and testaments, deeds, and letters. Many of these documents were written by native speakers for use by native speakers, such as local administrative texts. Other texts were written to be used by Spanish speaking priests and were likely created in collaboration with Spanish speakers.

The texts currently available on Ticha are written in Zapotec from the Central branch, often referred to as Colonial Valley Zapotec. The **Ticha Bibliography** lists works written about Colonial Valley Zapotec.

COLLEGE

Cultural context

When the Spanish arrived on the coast of what they were to call New Spain—which included what is now modern-day Mexico—the Zapotec people had already been writing for some 2,000 years. It was therefore not surprising that they quickly adopted the alphabetic writing system. Such writing was introduced as part of an expansive undertaking that had as its objective the conversion of the indigenous population to Christianity. This project created the need for a learning process unprecedented in world history: describing and analyzing the multiple languages of Mesoamerica. The results of this project were numerous dictionaries, grammars, and religious works created by Dominican friars relying heavily on the collaboration of Zapotec speakers.

These indigenous communities began to utilize alphabetic writing to create documents in their own language for their own purposes, including wills, land titles, and songs. Researchers have identified colonial documents written in Central Zapotec, Cajonos Zapotec, Nexitzo Zapotec, and Sierra Juárez Zapotec. Today these texts are dispersed throughout local, state, national and international repositories and archives. Currently, Ticha provides access to colonial documents written in Central (Valley) Zapotec, such as the *Arte*, a book that seeks to describe the structure of the Zapotec language, and many wills.

The indigenous language documents are invaluable sources in understanding the historical and cultural developments of Mesoamerican peoples from the beginning of the colonial period until the present day. Unlike Spanish texts, these native language documents describe the world using their own cultural categories. For example, in Zapotec wills the testator might offer his soul to God to be eaten and his body to be consumed by the earth; clear continuities of indigenous perceptions related to death. These texts, and as such the Ticha portal, are a window for contemporary indigenous communities and scholars alike to explore Zapotec history, language, and culture.

Arte en lengua zapoteca

A 16th century grammar of Colonial Valley Zapotec by Friar Juan de Cordova.

About the Arte en lengua zapoteca

The Arte is a grammar of Colonial Valley Zapotec published in 1578, a decade before the first grammar of English was published. It was written by Juan de Cordova, a Spanish priest in the Dominican order, although, like other Spanish clergy working with indigenous languages, Cordova relied on the help of native speakers of Zapotec. Unfortunately, little is known about these helpers, which means that we do not know precisely what variety of Zapotec the Arte records. Cordova wrote his Arte like a Latin grammar, making it difficult for modern readers to understand the structure of the text. In order to illuminate the content of the text, modern headings are given alongside Cordova's original section titles. Despite the Arte's shortcomings, it remains an important source for knowledge about Colonial Valley Zapotec.

Below is an excerpt from in-progress work: a modern Spanish version of Cordova's *Arte en lengua zapoteca*. The Spanish modernization is intended to make the original text more accessible to readers by modernizing spelling, word boundaries, and capitalization choices. Words are not modernized beyond spelling—so uncommon, archaic words or forms of words may be found. Word order is also not changed. Latin words are in italics and are currently untranslated. Zapotec words are in red, which links to morphological analysis where available. Feel free to offer suggestions via the [contact us link](#).

Unknown Town

Doctrina christiana en lengua castellana y çapoteca

A religious text in Colonial Valley Zapotec.

About the Doctrina

The Doctrina is a religious text published in 1567. It was written by Pedro de Feria, a Spanish friar in the Dominican order, but prepared with the help of native speakers of Zapotec. Unfortunately, little is known about these speakers, for instance, what variety of Zapotec they spoke or where they lived. The Doctrina is comprised of 233 pages, each with a column of Spanish text on the left and Zapotec on the right. The subject matter of the Doctrina is an explanation of Catholic doctrine. Because it contains long passages of text that span more topics than many of the handwritten documents, it is a valuable source for knowledge of Zapotec syntax and semantics. It also gives insight into Spanish religious beliefs at the time.

About Pedro de Feria

Pedro de Feria was a Dominican priest and missionary to Mexico. He was born in Spain around 1524. He became a priest in 1545, and spent his life thereafter in study, writing, and church administration. His primary mission was to the Zapotec, and he composed the longest early book in the Zapotec language, *Doctrina Cristiana en lengua Castellana y çapoteca.* (1567). Feria also wrote a Nahuatl-language doctrina, and served as the Bishop of Chiapas before his death in 1588.
